Over 60 years of Medical and Boat Building Experience
In Country-Medical Crew & Maintenance Training Options

Vessel options include:
Mother and Child | Dental
ENT | Ophthalmology | VCT | X-Ray Screening
Mobile Medical Solutions

The intrinsic value of standardized platform design is created by simply increasing the standard module's plate thickness and either increasing or reducing bulkheads, frames or stringer intervals, allowing for infinite engineering options to suit client requirements with regards:

Modular Water Clinic Facility

Single or double Deck layout

Available in 6 to 24 meters

Includes Staff Quarters and several consulting rooms

Layout design for various clinic options

Easily deployed to remote locations

Standby Support Medical Supply Vessel

Single or double Deck layout

Available in 6 to 24 meters

Certified Safety

Layout to client requirements

Easily deployed to remote locations

Logistics and Portability

Single or double Deck layout

Available in 6 to 24 meters

Certified Safety

Layout to client requirements

Easily deployed to Remote locations

Multi Purpose Medical Supply Vessel

Long Range Supply Options

Massive Payload capability

On Site Assembly

On Board Power and Lifting Equipment

Minimal Operating Costs
